Jesse Krim

Senior Mobile Engineer | React Native Specialist | jesse.krim@gmail.com | getmentors.ai

Summary

Senior Mobile Engineer with 6+ years building and shipping consumer mobile applications across iOS and Android. Led architecture, performance optimization, and full App Store releases from 0→1 and rebuild phases. Deep expertise in React Native, TypeScript, mobile state management, and production-grade infrastructure. Strong product ownership across design, backend integration, and release cycles.

Work Experience

Get Mentors   Apr 2024 — Present
Founder / Senior Mobile Engineer

- Architected and shipped large-scale React Native application with 100+ components and 20+ Redux slices
- Led two full production releases, including complete architectural rebuild
- Reduced network payloads by 80–90% via tiered data loading and optimized API design
- Built real-time streaming mobile AI chat interface optimized for performance
- Implemented deep linking, navigation restructuring, and performance profiling
- Owned iOS and Android builds, release pipelines, and production deployments
- Integrated monitoring and crash tracking with Sentry
- Designed 200+ backend API endpoints optimized for mobile consumption

FanDuel   Sep 2023 — May 2024
Software Engineer (Mobile)

- Core React Native engineer on FanDuel TV OTT streaming platform
- Built 10+ production mobile screens and flows integrated into Sportsbook app
- Led cross-org integration initiative as sole frontend engineer
- Optimized rendering performance in live streaming screens
- Shipped live streaming guide comparable to major OTT platforms
- Resolved production incidents in collaboration with backend teams

Next Gen HQ   Aug 2021 — Sep 2022
Lead React Native Engineer

- Led build and deploy cycles of the mobile app to the App Store and Google Play
- Collaborated with designers and backend developers to build features consistent with existing codebase conventions
- Built dozens of flexible React Native components and screens with backend APIs
- Participated in codebase design discussions regarding application architecture and feature implementation

Crew Me Up   Jun 2020 — Aug 2021

React Native Engineer

- Led three devs handling end-to-end software development life cycle through multiple app store launches delivering updates to 4k+ users
- Built backend Node API functions and new frontend features to enhance UX
- Designed and developed V2 UI/UX, including data types, mockups, and navigation flows
- Created and delegated frontend and backend tasks, filling in as project manager

Skills

- **Mobile Development:** React Native, TypeScript, Redux Toolkit, Expo, iOS, Android, App Store Connect, Google Play, Navigation, Reanimated, E2E Testing, Performance Optimization
- **Backend:** Laravel, Node, REST APIs, PostgreSQL, Redis
- **AI & Infrastructure:** OpenAI, Anthropic, N8N, Streaming APIs, Semantic Search, Vector Databases, WebSocket APIs

Education

Syracuse University   2013 — 2017

Information Management & Tech; Entrepreneurship

Study Abroad: Tel Aviv University, Israel (Entrepreneurship Program)

Hack Reactor   2019

Advanced Software Engineering Immersive, New York

800+ hours of intensive training in JavaScript, full-stack development, and production engineering practices

ELVTR   2021

Product Management, New York

Product strategy, research frameworks, and execution taught by a Google Speech PM
